FIGURES THAT TELL WONDERFUL STORY

Vast Importance of Utah's Mining Industry Not Easily Realized.

PAYROLLS AMOUNT TO MILLIONS EACH YEAR

Developments Now Under Way Will Greatly Add to Total of Wealth.

How great a part Utah's mining. emelting and kindred industries play in the State's growth and prosperity is not easily understood even by those who are well posted and who make the subject their principal study. The matter is one of particular significance at the present time, in view of the sifmulus that is being given to Bingham, Alta, Stockton, Park City and other camps by the assurance of successful completion of plans for the en-largement of the valley's smelling and concentrating capacity

Some Figures Available.

Some valuable figures are available, these being taken from the sworn answers filed by the principal smelting companies of the valley in the answers to damage suits filed by about 16 farmers, who seek to recover damages alleged to have been done to their farms by the fumes from the plants.

Maintains Armies of Men.

From these documents it appears that the American Smelling and Refining company employs at its plants not less than 1000 men, who receive an annual wage of 1660,000; that in the mines of the Statewhich supply this company with ores, 367 men are engaged, the payroll for which amounts to \$427,000 per annum; that this company pays \$76,000 per year for fuel and fluxing material and produces builton at the rate of \$1,000,000 per month.

This Only Beginning.

When one remembers that the American company new has about 700 men employed in the construction of a new copper plant, which, when completed, will almost double these figures, the significance of what this one company is doing for the development of the Stage can be better appreciated. But this is only the beginning of the list.

Other Big Concerns.

Other Big Concerns.

The United States mines and smelter testify to the employment at its plants of 769 men, regolving annually 250,660 in wages, with ailled industries, comprising the Centennial Eureke mine with Sie men receiving \$2,880,000 yearly, the United States mines with a similar payrell, while the smelters produce builton monthly having a value of more than £60,000. The Bingham Consolidated company pays annually for wages and supplies more than £60,000 and the easily reckoned total of these payrols for this valley, reaching as it does into millions of dollars yearly, does not include the Boston Consolidated the Yampa, the Ohlo Copper, the Utah Copper and others that might be named.

Great Things Ahead.

Great Things Ahead.

When the projected plant of the Utah Copper company, now under construction, reaches its full capacity, which will be accomplished not more than two years distant, this alone will turn into the market from Utah mines 50,00,000 pounds of copper buillen yearly, having a value, it copper maintains its present standard, of more than \$7,50,000. One of the best posted mining men of the State said during the day that with the plans of American Smelling company, the Utah Copper and the Boston Consolidated company carried to completion, the payroll of the valley plants would easily exceed \$150,000 per menth.

These figures, fragmentary though they

These figures, fragmentary though they are furnish an understanding of the stupendous importance of the mining industry to this city and State aithough the best experts agree that the camp of Bingham, the oldest in the State, is as yet only scratched and that its future development is not yet appreciated by the most enthusiastic operators.

AT ALTA-FLAGSTAFF.

Fine New Buildings Are Being Rushed for Winter.

Rushed for Winter.

Work is being rushed on the new buildings of the Alia-Flagstaft in order that the winter's campaign may not be delayed. Said Manager James E. Beveridge who is down from camp superintending the forwarding of material. The season's development work has been unusually satisfactory and there is small doubt that the property will make a good record during the winter.

That the entire camp of Alia is very active and in better shape than before in many years was testified to by A. O. Jacobson, superintendent of the Columbus Consolidated, who has been called to bits home here to greet a newly-arrived daughter and is in consequence receiving the congratulations of a host of friends.

Lake Superior Iron-Ore Shipments.

Lake Superior Iron-Ore Shipments.

The total movement of iron ore from the Lake Superior region by water this year, up to October 1, was 25.473,665 tons, an increase of \$7 per cent over last season. With two months of navigation left, this points to a total approximating 25, 60,000 tons for the season; an increase of 75 per cent over last year's movement. The great tonuage this year is largely due to increased consumption; but in part also, it results from the reversal of the policy of the Steel corporation, which is accumulating large stocks in its furnace yards, while last year the shipments were limited to the needs of the furnaces.

Utah Specimens in Demand.

W. H. Tibbals a well-known local mining man is receiving numerous orders for rare specimens of Utah minerals for museum cabinets and other play burposes. During the day he received a request for the furnishing of 10e pounds of azurite sandstone, a formation found in the La Sal country. He will furnish the desired quantity and it will be settled for on a hasis that in larger quantities would amount to \$200 per ton.

May Be Bonanza.

Attorney James M. Hamilton is in recelpt of samples of one from locations
made by an old client of his. D. A. Winn,
of Vernal, who has spent the season prospecting in the Bighorn mountains of Wyoming, which, if found in large quantities, can mean nothing less than a veritable bonanca. The rock will carry at
least 49 per cent copper, and Mr. Winn
writes that he is opening a big body, of
average.

.. Judicious Inquiry.

A well-known traveling man who visits the drug trade says he has often heard drugglats inquire of customers who neked for a cough medicine whether it was wanted for a child or for an adult, and if for a child they almost invariably recommended Chamherlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it, and for coughs, colds and croup it is unsurpassed. For sale by all leading druggists.

BINGHAM CON. PLANT ADDITIONS READY

Increased Equipment Will Go Into Commission Early Next Month.

Official aunouncement is made by the Singham Consolidated Copper and Gold Mining company that its new additional equipment for its smelter will be ready to be placed in commission early in Newenber. The new reverberatory is new practically finished and the roasting plant is well under way.

Can Handle 1000 Tons Daily.

With these additions to the present plant completed and placed in operation the company will be capable of handling not less than 1000 tons of ore daily. The capacity of its plant is now taxed to the utmost, as in addition to other ores received, the properties which the company is operating in its own interest are being rapidly developed and are now in condition to supply a steadily increased tonnage.

THE DAY ON 'CHANGE.

Trading Is Fair, but Market Shows Influence of Bears.

The day's trading on the Sait Lake stock and mining exchange closed with the records showing the transfer of 22.06 shares, having a market value of 57.28619, with the market generally showing some succeptibility to bearish tendencies. Columbus Con. on the open board, was marked by the continued taking of profits by shareholders who got in when the stock was far below \$2 and on this trading the shares declined to \$2.19, although well posted mining men predict an active marthe shares declined to \$2.19, atthough well posted mining men predict an active market for the stock at \$3 or better within ninety days. Silver Shield was to be had at 125 cents and Stor Con sold 1000 shares at 145 cents. Uncle Sam, which is steadily marketing good ore, sold at 325 and 34 cents. Now York Bonara was dealt in at 14 cents and a shade better, while Wahnsh declined to \$5 cents. Daly-Judge, which has picked up considerably on the prospects of an early starting of the mill brought \$6.40 for 100 ahares and Daly West commended \$14 for a block of \$5 shares. The day and call closed with quotations and sales as they follow.

Ore Shipments.

The Pioneer sampling is in receipt of two cars of ore from Tintic, and one car from Stockton. Taylor-Brunton are in receipt of one car of ore from Bingham, three cars from Tintic, seven cars from Nevada, two cars from Idaho and three cars from Frisco.

NEW ENGLAND IS SHIPPING GOOD ORE

Mine's Output Is Now Netting the Company \$500 Per Car.

ANOTHER SHIFT WILL BE ADDED TO MILL FORCE

This Bingham Property Is Reported as Opening Up in Fine Shape.

The receipts of a car of ore at the Tay or-Brunton sampler from the property of the New England Mining company, Bingham, furnishes another evidence of the fact that it is not alone the big properties that are adding to the profitable output of the district.

Ore Is High Grade.

This shipment will not the company not iess than \$500 for the single car and another which is now being loaded will reach the market during the week. Man-ager Adkinson is so pleased with the fa-vorable developments of the past month that he has decided to add another shift to the mill force, hence the output of concentrates will be correspondingly in-creased.

Operates Old Nast Mill. The New England company is now operating the old Nast infine, and that the property will prove profitable to its present owners, those who know the record now being made fully believe.

SURVEYOR LOSES CLAIM. Court Decides That He Is Debarred

From Making Locations. A Pioche Lander county, dispatch says: Mining men all over the West will be interested in a case that will probably be carried from this county to the Su-preme court of Nevada within a short

preme court of Nevada within a short time.

Charles Hand and A. W. McCune were the owners of a rich gold ciaim in Meadow Valley, but upon their neglect to do the assessment work within the proper time the claim was jumped by John Cook, a deputy mineral surveyor, who at one time had performed some work upon the property. The original locators brought suit to regain possession and in deciding the case Judge George S. Brown of Elko beld that Cook, being a deputy mineral surveyor, is debarred from making mineral locations.

Several years ago a case of somewhat similar nature was carried to the United States Supreme court, but the right of a deputy passed upon.

WILL MINE IN TOOELE.

Bingham Anaconda Company Files Articles of Incorporation.

The Bingham Anaeonda Copper company filed articles of incorporation in the office of the County Clerk Thursday. The company is capitalized for \$500,000, divided into shares of the par value of \$1 each, and the officers are as follows:

Lester B. Freed, president; C. Mochest, vice-president; Edward McGurtin, secretary and treasurer. These, with Leon G. Skliris and Frank J. Gustin, constitute the board of directors.

The company owns the Daisy Nos. 1, 2, 2, 4 and 5 and the Daisy Extension claims in Toole county.

Hornblower & Weeks's Copper Letter. NEW YORK, Oct. 28.—The Boston market continues very satisfactory for the bulls. The day's market was for the most part very strong. Early prices were fractionally below the previous night's close, but a good demand was in evidence and advancing prices were seen under the lead of Copper Range, North Butte and Hoston Con. The tone throughout the whole copper list is excellent and unless something serious happens in the New York market, our local shares will get on a much higher level. Closing prices were irregular

Good Ore in Odin.

Assays received on samples of the streak of ore now being developed in the Odin of Park City, said Judge W. I. Snyder during the day, show values of seventy-five ounces silver, 25 per cent lead and \$2 gold per ton. He also reports that the ore is coming in stronger and that there are favorable indications for a permanent and well-defined vein.

Ore and Bullion.

Ore and bullion settlements during the day amounted to \$169,309, McCornick & Co. reporting them as they follow. Gold, silver, lead and copper ores, \$35,709, base bullion, \$22,309; gold bars, \$6339.

In the metal market silver advanced to \$23, cents per ounce. Copper remained at 16 cents per pound, and lead sold at \$3.59 and \$4.85 per hundred pounds.

HIGH-GRADE ORES FROM THE POTOSI

Shipment Received Carries 60 Per Cent Lead and 13 Ounces Silver.

From the Potosi mine, operated by Mahoney Brothers at Good Springs, Nev., came a car of ore yesterday to the Tayfor firunton sampler, affording a convinc-ing demonstration of the high-grade pro-duct furnished by a region little talked

More Than Half Lead.

The slipment was settled for on a basis showing values of 60 for cent lead and 123 outces sliver per too. Recent development work on the Potoal has revealed a large quantity of ore of this character and as a result considerable prospecting of other locations is being carried on and will be maintained throughout the winter.

Makes Rich Strike.

A sensational strike has been made on the Builfrog Fraction claim, which lies midway between the Original Builfrog mine, that of the Builfrog Extension Missing company, and adjoins all three, says the Goldheld News. At the thirty-foot level a bedy of ore four feet wide has been encountered that averages \$3871.44 per ton in gold and silver.

Mining Notes.

The Black Ulamond of Smokton will have a hipment on the market this wesk Two cars of concentrates from the Uncle Sam of Tintle are on the market and reports from the mine continue satisfactory to the man-agement.
